CERAMIC ROOF TILES**

ABOUT PALI CERAMIC ROOF TILES

Pali has earned a practical know-how about what roofing tiles suit where, particularly in typical Kerala weather. Pali never compromises on quality, thus maintaining a transparent & stringent manufacturing industry around the world. Our tiles will withstand the hardest of weather conditions and are made with the best of technology, raw materials and the state-of-the-art machinery. Pali's R&D team is working continuously working and updating necessary changes to make the product unique and foolproof.

Why Compromise On Your Roof

- ▶ Ceramic tiles are pure natural products that satisfy all requirements of environmentally friendly construction in a way that hardly any other building material can match
- ▶ These roofs ensure fast runoff in case of heavy rain, allowing easy maintenance of drains. Additionally, they are suitably resistant to moisture and other fungus-like vegetation
- ▶ Moreover they have solid grip for screwing with extra embossed unbreakable support
- ▶ The specially designed water gutter will eliminate any chance of leakage
- ▶ Tile to tile locking system for extra grip.
